I Need More Land !

But—I'm Going to Get It without Buying an Acre

HERE'S HOW

My summer inventories show that I have a large stock of certain items—more than I ought to have. The seed used was exceptionally good and the stand surprised me. Now I must again transplant the seedling conifers and the plants and clumps of broad-leaf evergreens and deciduous shrubs. Some of the perennials are in surplus also, and these must be *sold* or moved. And to tell the truth, I would rather sell them than transplant them.

{ So, if you order from this list
you are getting good bargains.
You win—and I lose! }

These bargains do not mean a lessening of my standard of quality—simply a reduction of price to a point that should interest every nurseryman. I need land for other operations; to get it means selling this stock.
